Fall-2026 CY-Department

Theory Programming Assignment

Course Code: CS2006	**Course Name: Operating Systems**
Open Date: 14th Feb. 2026	**Due Date: 24th Feb. 2026**

1. Make a "hello world" system call.
   - You need to download a newer version of kernel and ***name that kernel your roll number*** *(if the teacher executes the command uname –r, it must display your roll number as kernel version)*
   - Add a hello world system call with the help of this tutorial.
   - Then configure the kernel with the help of the given lab manual.

Checking:

Students are required to save a screenshot of each step and define it in word doc with a sequence; the document (***named: k174224_OS_A1.doc***) will be submitted on the GCR.
Students must bring their laptops for the demo of the assignment.
(The date will be given by the Teaching Assistant)

Note*: In case of any ambiguity consult your teaching assistant.*
